v2 corrections: v1 substituted MXR EVH Phase 90 for Uni-Vibe — but you own the M68 Uni-Vibe (gear.txt:27), so the correct slot is now filled. Pedals not engaged for this song are omitted entirely (per recipe-purity rule). Each owned pedal shown with its actual photo + dial overlay; amps shown as Fender-styled control panels. **Knob convention:** pedal knobs sweep 7 o'clock → 5 o'clock (300°); amp knobs use 0–10 numeric (0=7 o'clock, 5=12 o'clock, 10=5 o'clock). Orange ring = annotated dial position; orange line indicates direction.
