

Kenny Wayne Shepherd — Voodoo Child (Slight Return)

Bonus track on the *Blue on Black* CD single (Revolution, 1997) — recorded during the *Trouble Is...* sessions. Eb-standard tuning.

Era rig: Blackface Twin reissue + Vibro-King + '64 Vibroverb Drives: Uni-Vibe, TS808, Klon Centaur, Roger Mayer Octavia

Strings: .011 / .014 / .018 / .038 / .048 / .058 Pick: Dunlop heavy

TWO-AMP SETUP — PAN + BLEND

Run both amps simultaneously. Pan one ~10 o'clock, the other ~2 o'clock. Goal: amps just on the verge of breakup; pedals send it over the edge. **VERIFIED** = KWS published numbers **ASSUMED** = interpolated for your amp

Tone Master Twin Reverb **MATCH: TWIN REISSUE**

CLEAN PLATFORM · PAN ~10 O'CLOCK

Channel	Normal
Volume	5–6
Treble	6
Mid	6
Bass	5
Presence	4
Reverb	3–4
Bright switch	OFF

Normal channel (not Vibrato) when blending two amps — phase issues otherwise.

Blues Deluxe **ANALOG: VIBRO-KING ROLE**

CRUNCH PLATFORM · PAN ~2 O'CLOCK

Channel	Normal (drive OFF)
Volume	6–7
Master	5–6
Treble	6
Mid	6.5
Bass	5
Presence	4
Reverb	2–3

Translated from KWS's published Bassman settings (vol 7 / treble 7 / bass 5 / mid 6.5 / pres 4). Blues Deluxe is hotter — back the volume off and stop short of fizz.

"What I really like is them to be just on the verge of breaking up, then the pedals send it just over the edge." — KWS, *MusicRadar* 2018

PEDAL CHAIN (FRONT OF AMP)

- Guitar — Fender Ultra Luxe Strat (bridge for main riff, neck for funk break)
- TC Electronic PolyTune 3
- Dunlop MC404 CAE Wah — **ON for intro riff & funk break**
- MXR EVH Phase 90 (script mode) — **ON for the funk break only** **UNI-VIBE SUBSTITUTE**
- King Tone Duellist — Heavy Hand side (**stack target for solos**) **KLON-FLAVORED BOOST ROLE**
- Ibanez TS808 — mid-push, on for solos
- MXR Analog Chorus — off (not used on this track)
- EVH 5150 Overdrive — ~~wrong character; bypass~~
- TC Electronic Hall of Fame 2 — light room reverb
- TC Electronic Flashback Delay — off; engage sparingly for solo accents only

Octavia moment: KWS uses a Roger Mayer Octavia for one brief octave-up section (he's said the octave effect, not the fuzz, is the point). You don't own one — skip the moment or substitute if you've added an octave pedal since the last gear update.

PEDAL SETTINGS — STARTING POINTS **CLOCK-FACE = INTERPOLATED**

PEDAL	KNOB	SETTING	WHY
King Tone Duellist (Heavy Hand)	Drive	12–1 o'clock	Klon-style transparent push w/ a bit more attitude. Stack on top of TS808 for solo lift.
	Tone	11 o'clock	
	Volume	1 o'clock	
Ibanez TS808	Drive	9 o'clock	SRV/KWS recipe: low drive, high level, pushing the amp's own breakup — not adding pedal distortion.
	Tone	12 o'clock	

	Level	2 o'clock	
MXR EVH Phase 90	Speed	~10 o'clock (slow)	Press button OUT for script mode (smoother, less pronounced). Closest you have to the 1997 Uni-Vibe role for the funk break.
	Script switch	Script mode (out)	
Dunlop MC404 Wah	Q	Vintage (lower Q)	Hendrix-tradition wah voicing; vintage inductor for warmer sweep.
	Inductor	Yellow / Vintage	
TC Hall of Fame 2	Decay	9 o'clock	Light ambient room. The track is amp-reverb-forward; HoF only fills in.
	Tone	12 o'clock	
	Level	9-10 o'clock	

SONG-SPECIFIC DEPLOYMENT

- **Tuning:** Eb standard (Eb–Ab–Db–Gb–Bb–Eb). Matches Hendrix studio tuning — KWS plays it in B-natural shapes against Eb tuning.
- **Pickups:** Bridge for the main riff. Neck for the funk-break "stand up next to a mountain" section.
- **Intro / main riff:** Wah ON. Drive stack OFF for the dry-clean opening; kick TS808 in as the riff settles. Phase 90 OFF.
- **Funk break:** Engage Phase 90 (script). Neck pickup. Wah on the rhythmic chord stabs.
- **Solos:** Stack TS808 + Duellist Heavy Hand. Bridge pickup. The Blues Deluxe should be audibly grinding.
- **Octavia moment:** One small octave-up section — skip if you don't have an octave pedal patched in.

VERIFIED VS. ASSUMED

Verified V

- 1997 amp rig (Twin reissue + Vibro-King + '64 Vibroverb) and pedal lineup — KWS, *The Music Universe* 2022.
- Voodoo Child = bonus track on 1997 *Blue on Black* CD single — Wikipedia / Discogs.
- Two-amp pan strategy, normal-channel-when-blending rule, "verge of breakup" philosophy — MusicRadar 2018 rig tour.
- String gauges and pick choice — Premier Guitar 2023 rig rundown.
- Eb tuning + Octavia for one small section — KWS, MusicRadar.

Assumed / interpolated A

- Duellist Heavy Hand as Klon Centaur analog — circuit-philosophy mapping, not KWS-demonstrated.
- Phase 90 (script) as Uni-Vibe substitute — adequate, not equivalent.
- Blues Deluxe in the Vibro-King role — closest you own; Vibro-King breaks up smoother. Stop short of fizz.
- All clock-face pedal positions are starting points — KWS hasn't published per-song pedal settings.

TEST NOTES — BRING BACK FOR GEAR TAB

- ☐ Twin volume sits where I put it / wants to come down / wants to come up: _____
- ☐ Blues Deluxe breakup point felt right / fizzy / too clean: _____
- ☐ Pan placement (10 vs 2 o'clock) sounded balanced: Y / N — adjustment: _____
- ☐ TS808 level @ 2 o'clock was too hot / right / not enough push: _____
- ☐ Duellist Heavy Hand drive position: _____ Volume: _____
- ☐ Phase 90 script mode read as Uni-Vibe-ish? Y / N — alt: _____
- ☐ Wah voicing (Vintage Q): kept / switched to GCB95 / Modern Q: _____
- ☐ Octavia gap: noticed / didn't matter: _____
